

WOLF EVENT

6-8th March 2009

Purge of Svartelfhiem

For several years the Svartelves have plotted and conspired against the Wolves, seeking to win the favour of the gods above those truly worthy. To this end they have even resorted to using poisons and have dared to interfere with, and jeopardise the restoration of Magni.

At Carnivale the warhost received a lead as to where this foe may reside and their route to Midgaard. Lord Wolf calls upon his warhost and those allies who wish to join them – travel to this place in Norsca called the Gates of Mist. The time has come to take the war to the Svartelves and show them who the gods truly favour above all others.
